The Social Justice Advocate

We received this week a copy of a new Alberta monthly, "The Social Justice Advocate." It is stated to be the organ of the Alberta Provincial Douglas Social Credit League. It has good typographical make-up and contains some very interesting and instructive articles on social credit, etc.

Flandin Predicts

American Supremacy

Paris, Sept. 28.—M. Pierre Etienne Flandin, Minister of Public Works, returned from a trip to America, said today: "It will not be long before the American continent will take complete direction of world affairs. Europe, meanwhile, is going the way of Greece in the ancient world."
 He was speaking before the American Club, praising the warmth of the reception given in Canada, where he attended the recent Jacques Cartier celebration.

The Minister described his visit with President Roosevelt, and, commenting on the New Deal, said: "It is better to make mistakes, as I feel the United States is doing in some cases, than to sleep and do nothing."
 Of Canada, he said: "I found the French language and customs are not only holding their own, but making progress in Canada."

Magic Fodder Amazes

Farmers in England

English farmers are becoming interested in the Spangenberg system of raising fodder crops indoors every ten days by means of chemicals.

Dr. Spangenberg, the German chemist of Lubek, who invented the process of growing fodder crops in chemically treated trays arranged in tiers inside of metal cabinets, claims that 40 of these metal cabinets will produce in a year about 4,320 tons of fodder, enough for 1500 head of cattle.

At the Ipswich agricultural show the farmers were amazed at the demonstration given of the new invention. The British Cultivators, Limited, has patented the process under the name "Kwick Grow" and the German government has ordered a large number of cabinets for use in the concentration camps.

Dr. Spangenberg discovered the process by carefully analyzing the most fertile soil he could find and then duplicating its nutrient content in a chemical

Liberal Convention

A Convention of Liberals of the Empire Constituent, will be held at Empress, Alberta, on Friday, October 19th, 1934, at 2 o'clock p.m. For the purpose of nominating a candidate for the ensuing provincial election. Mr. W. R. Howson, provincial Liberal leader and others will be attending a meeting after the convention.

Donations of Vegetables

Appeal for donations of vegetables from those districts having an abundance of these to be shipped into the relief areas of the province is being made by the provincial department of agriculture. Local organizations such as boards of trade, service clubs or church societies are asked to supervise the collection and loading of such supplies, which are to be made in carload lots, and the department of agriculture will direct the shipment, while the railways have agreed to transport the supplies free of charge. The cars will be shipped care of the municipal secretaries in the various districts concerned, and these officials will have charge of the distribution of the donations. Some 50 carloads of such supplies are needed this year, to serve some 3,000 families. Already a number of donations have been received.

The bye-elections held on Monday in Ontario, resulted in electing four liberals and one conservative to seats in the House of Commons. F. I. Church, conserv., was elected in Toronto East; W. H. Miller, lib., Elgin, West; Colin Campbell, lib., Frontenac-Addington; W. P. Mulock, lib., North York; Hugh P. McKinnon, lib.-lab., Kenora-Rainy River.

Bargain Railway Fares

Tickets on sale September 21 to October 2, Canadian Pacific bargain fares offer. Mr. C. R. Moore advises that coach fare rates: Empress to Montreal, \$39.80; Empress to Ottawa, \$37.45; Canoe tourist, \$40.00; Ottawa, \$67.00 Return limit thirty days.

selection. No earth is used in the process, but the chemical is fed to the seed which is said to produce five times as much as seed planted in the ground.

There are ten sections in each cabinet, one for each day's growth, and each section contains eight trays. With the harvesting of each day's crop, more seed is put into the trays to produce another crop ten days later.

Provincial farmers who have tried the system state that the cattle and pigs fed with the crops produced are in better condition than others fed with ordinary fodder grown out doors. The animals get the first June pasturage grown every day of the year.—Bask Farmer.

Bindloss Notes

Miss Thura Luck, of Calgary, is spending her vacation at the home of Mr. and Mrs. O. Fieldberg.

Mr. H. McDonald is away on a trip north.

Mr. and Mrs. A. T. Barber and Mrs. A. G. Bendall, have returned from a trip to Pine Lake, Innisfail and Calgary.

Despite unfavorable weather, a very enjoyable dance was held here on Saturday evening, there being a fair crowd.

British Boat is Defeated in

Racing Series for Cup

After winning the first two races, the British boat, Endeavour, lost out in the subsequent four races. The Bodysaver, in the opinion of experts, is the faster boat, but carried an amateur crew, which apparently was not as adept as the professional crew of the Bodysaver. Opinion is also that the defending yacht was handled better.

Registration for Dominion Elections Starts Oct. 15

Ottawa, Sept. 16.—Calling for registration of Dominion electors in all electoral districts to commence Oct. 15 and terminate Nov. 17, a proclamation is being issued by Col. John Thomson, Dominion franchise commissioner.

The proclamation which will be published in the Canada Gazette, said enumeration in urban and rural polling divisions will commence Oct. 15, and shall end October 30.

The rural enumerator will sit twelve and correct their preliminary lists, Nov. 13, 14 and 15.

The Provincial Government received payment of \$453,425 from the Alberta Wheat Pool, this being the annual interest due this month on account of the 1933 Pool overpayment. The Pool is living up to its obligations to the Government in a creditable manner.

Rally Day Service

Sunday, September 30th, is Rally, and a combined Sunday School and Church Service will be held in the United Church at 11:30 a.m. All the children and adults are invited to this Special Service.

Social Creditors Organizing

Social Credit supporters of the Hand Hill constituency, are rallying at Hanna, on Tuesday, September 25. It is said that the purpose of the meeting is for selecting a strong committee to supervise organization of the constituency, preparatory to forthcoming elections.

Famous Rodeo Performer Dies

Husker, Alta.—Henry Le grandeur, world's champion bucking horse rider from 1913 to 1919, and winner of many stampee medals, died in hospital at Bassano, Tuesday. Le grandeur who was manager of the Husker rodeo, was an official of the Calgary stampee.

St. Mary's Anglican Church

Sunday, Sept. 30th: Eucharist, 11:00 a.m., Holy Communion.
 Catechism, 2 p.m., evensong and sermon.
 Eucharist, 4:00 p.m., evensong and sermon.
 Rev. J. S. Parks, Vicar-in-Charge.

Balzac Boy Reaps Valuable Barley Crop

A Balzac boy, Fred Pleschel, member of the Balzac Barley Club, has reason to be proud of his accomplishments in raising barley and has incidentally reaped a rich harvest from his efforts this year. In 1933 he reaped through his junior club nine bushels of O.A.U. barley, from which he reaped sufficient seed to plant over a hundred acres this spring. This season he harvested 3,500 bushels of the crop, for which he received 74¢ a bushel, a neat return of almost \$2,600.

A FURTHER STEP on the Road to Recovery

A Statement by the Prime Minister of Canada

THE Dominion of Canada will offer for public subscription within the next few days the 1934 Refunding Loan. It is an undertaking of such significance to every citizen that I think it fitting to present this brief explanation of its close relation to the welfare and continued progress of our country.

The 1934 Loan is not an incidental effort. It is a part—and an essential part—of the great debt conversion programme in which Canada has been engaged since 1931, and by which we are refunding at maturity the large sums borrowed for wartime purposes. The national importance of this programme—and of the 1934 Loan as part of it—cannot be over emphasized. It is important from three aspects: 1.—National Economy; 2.—National Finance; 3.—National Recovery.

1. National Credit

National credit means to a nation what an honest reputation means to a man. Its maintenance is a primary essential and necessitates that each obligation be met fully and promptly, as it comes due. Our debt conversion programme is thus, in its first instance, our method of meeting our obligations and thus maintaining our credit.

By this programme Canada has already refunded \$528,000,000 of maturing wartime debt, and completion of the 1934 Loan will bring the refunded total to over one billion dollars. As a result, Canada's credit stands notably high, both at home and in the great money markets of the world.

Striking evidence of our high credit standing was given within the last few months when Canada secured immediate over-subscription of a long-term loan in London at a price to yield the investor less than 3½% and, in New York, obtained a loan of \$50,000,000 at a price yielding interest at 2 per cent. And there is equally striking evidence at the present moment in the fact that the Government of Canada is able to issue bonds without outstanding is selling today at substantially above its face price.

The twelve-year 4½% Bonds of the 1933 Refunding Loan, issued at 96½, are now selling at 104½ to 105, yielding approximately 3½%.

2. National Economy

The debt conversion programme, in the second place, is providing substantial savings in public interest charges. The debt which we are refunding was incurred with the highest rates at artificially high wartime peaks. Refunding is now being accomplished with interest rates throughout the country steadily down to normal levels—an encouraging world movement which is essential to business recovery. By refunding under these conditions Canada has already obtained a reduction of the previous interest charges amounting to more than \$6,000,000 per annum. The annual saving of over \$14,000,000 thus secured has a direct cash benefit to every taxpayer. This saving has much more than offset the slight increase on the debt which has been incurred to meet the extraordinary burden of unemployment relief. It has, to a considerable extent, offset the heavy burden which the depression period has imposed with respect to railway and other current requirements. It will also pave the way to tax reductions with the return to better times.

3. National Recovery

The debt conversion which Canada has achieved since 1931, by thus substituting national credit and securing national economy, has been a major factor in our progress toward business recovery.

A year ago, preliminary to the 1933 Refunding Loan, I took occasion to express the belief that Canada had passed the low point of depression and was definitely upon the road to recovery. Today, our progress toward recovery is a matter of established fact. Since the low point of February 1933, the trend of business has been moving steadily upward in an improved and sound and so consistently sustained that we need no longer doubt its reality.

The facts of business recovery are written beyond dispute in our statistical records. The most significant indices relate to physical volume of business, industrial production, carloadings, electric power production, employment and prices. Here is the record in each case:

	During Past Year	Since Low Point of February 1933
Physical volume of business...	15.4%	42.8%
Industrial Production.....	15.7%	56.9%
Carloadings.....	19.3%	29.4%
Electric Power Production.....	12.4%	32.7%
Employment.....	14.7%	17.1%
Wholesale Prices.....	4.0%	13.7%
Farm Products Prices.....	7.7%	43.3%

*In the case of carloadings, employment and prices, the latest figures available are those for August; in other cases, those for July.

Our external trade figures are equally encouraging. During the first eight months of the present year, exports of Canadian products increased approximately \$99,000,000, or 32.7% over the same period last year. Imports (excluding increase for imports) has been slightly under \$93,000,000, or 38.2%.

A Further Step

Anyone who reflects upon these three aspects of credit, economy and recovery will at once appreciate that the debt conversion programme is vitally important to every Canadian and that, consequently, the success of the 1934 Refunding Loan is the personal concern of every man and woman in the Dominion.

The 1934 Loan is a further step in a great national undertaking; its success means a further step on the road to recovery. I know that I need not stress the attractiveness of the Loan as the soundest possible investment, for that will be universally recognized. I do, however, earnestly call upon my fellow Canadians to support this Loan to the limit of their abilities as an opportunity to promote our national welfare. I know of no way in which the individual citizen can render greater service to himself and to his country.

DOMINION OF CANADA 1934 REFUNDING LOAN

Radio-Telegraphic Service In Northern Hinterland Now Proving Of Great Importance

Radio telegraphic business in the North West Territories is increasing with indications the current year may establish a peak for the service. Installed about six or seven years ago, the chain of wireless stations, operated by the Royal Canadian Signals, a branch of the permanent force, is busier with commercial traffic than with official or departmental work. This chain extends from Edmonton to McMurray and from that point, which is the terminus of the landline, down to the mouth of the Mackenzie River.

The principal stations are at Fort Chippewyan, Fort Smith, Rae, Reliance, Fort Norman, Cammell River, and Cameron Bay on Great Bear lake, and Ahlavi. Two radio posts are operated in the Yukon, at Mayo and Dawson. The north northerly is at Herschel Island.

The general movement into the north country has emphasized the importance of the government's chain of wireless stations. Since deposits around the shores of Great Bear lake have resulted in the establishment of numerous small settlements in that region, while reports issued from Fort Chippewyan indicate a rush of gold prospectors to the latest discovery on Lake Athabasca.

Of prime importance, particularly to agriculturists and to shippers of perishable goods, are the daily meteorological reports sent by the government signalers. The weather for the North American continent is "made" in the valley of the Mackenzie River, and the compiling of these at Toronto constitutes one of the most important of government services.

Highest In World

Great British Nets Millions From Succession Duties

The St. Thomas Times-Journal says: "In no country are the succession duties so high as in Great Britain, where, if the estates are large enough, the Chancellor of the Exchequer confiscates almost the lion's share of the amount. The Crowther estate is a case in point. The first Lord Crowther died in 1927, leaving an estate valued, in dollars, at \$20,000,000. In death duties amounted to \$8,000,000. In 1932, his widow died, her estate being valued at just over \$7,000,000. Of that amount the Treasury garnered exactly \$3,000,000. This year the second Lord Crowther passed away leaving about \$2,500,000, and the duties were around \$750,000.

"So that these three deaths netted for the government nearly \$12,000,000 out of an estate that was originally \$20,000,000.

There is not much left for the third Lord Crowther, who is the only son, and his five sisters. The British Treasury certainly makes the rich pay."

Bishop's Bribe Shown

In Cathedral Paintings

Structure Said To Have Been Built As Penance

Wall paintings 800 years old have just come to light in Norwich cathedral, England, as the result of restoration work by Professor Tristram of the Royal College of Art.

Especially interesting are three medallions supposed to depict the life story of the cathedral founder, Bishop Herbert de Losinga. The paintings bear out in a remarkable way the tradition that Losinga built the cathedral as a penance for buying the bishopric.

One medallion shows the bishop passing money across a table. The next shows him clothed in the full robes of a bishop with hands joined in prayer, and the last one is a picture of the completed cathedral. Professor Tristram says the paintings may last another 100 years.

A Cannibal Spider

The black widow spider, whose bite has caused several recent deaths in the western states, is not a sociable sort of insect. Mrs. Sarah Hill found three females and two males of the species in her cellar in Guntison, Utah. She put them in a fruit jar, and placed them on exhibition in a local barber shop. One of the females got hungry and ate up her four companions.

A novelist, who confesses that he is a hot autor, declares that he has never yet discovered any pleasure in a sex-trip. As far as he is concerned, it is all bunk.

Starting Western Career

America Recognizing Importance Of Soy Bean, Popular In Asia

The soy bean, which is the sustenance of so many millions in Asia, is beginning to have a career in America. Those who do not know about the soy bean have to have its excellence broken to them gently or they will be unable to accept all the glowing testimonies paid to its worth. Soy beans are as good as a wife and family and a farm to boot, if one ever does boot a farm. They can be made into almost anything, including fresh milk from the cow without the intermediary assistance of the cow.

Soy beans can also be made into various foods and into car accessories, fuel oil, glue, soap and other commodities. Henry Ford has an idea that soy beans may turn small farms into factories, for once the beans are raised they can be manufactured into almost anything the farmer chooses. Ford is encouraging this view by planting a model plot and having them displayed in Chicago. They are not yet being raised in quantity, but if the farmers of America once start growing them, their hardy qualities will make them a favorite crop. The Chinch bug won't touch them, though other caterpillars find them toothsome. —Hamilton Spectator.

PARIS FAVORS ROMANTIC COVERED SHOULDER AND FLUTTERING THEM FOR EVENINGS

To-day's pattern brings this Paris dress to your very door. The allure of the covered shoulders makes it so much more feminine and flattering. The fluttering hem trails the ground.

You'll look as pretty as a picture in this dress of crisp satin in violet-blue as the original model.

It could be carried out in Lyons velvet or taffeta, with equally charming results.

It's simplicity itself to make it. The pattern is:

Style No. 459 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 36 requires 3 1/2 yards of 36-inch material and 7 yards hanging. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

"Hey! You just put that hat back on my head. Do you want me to get sunstroke?" —The Humorist, London.

Development Of Television

Trials Made In Germany Said To Organize Starting In Australia

The German post office announces a spectacular plan to introduce "television-telephony" in the near future.

Trials between Berlin and Munich were reported to have resulted favorably. Postal authorities planned to install television-telephony between the larger cities, further extension of the system depending on public reaction "because of the still high cost of apparatus."

The announcement was made while Germans still thrilled at what technicians called "satisfactory" sound film broadcasts, which were demonstrated at the 11th German radio congress by means of a television set. Daily transmission of tone films taken from the top of a television car of the German Radio Company stationed in the immediate vicinity of Berlin's radio tower captivated thousands at the radio show.

Scenes were shot with an ordinary sound picture camera from the top of the car and were developed and ready for reproduction after 75 seconds. The car was equipped with developing and transmitting apparatus. The technical side of the procedure reveals that each picture is directed into dots by means of a perforated disc. The dots are converted into electric impulses which are broadcast on a seven-metre wave length while sound is transmitted simultaneously over an ordinary radio wave.

Technical appliances permit transmission of 20 pictures a second.

The receiving set is equipped with a large tube based upon the cathode ray system. The tube produces a short stream of invisible electrons which are thrown on a fluorescent screen. The pictures appear clearly.

Method Greatly Improved

To produce and harvest the wheat crop of the three Prairie Provinces by the methods used 100 years ago would require the labor of all the farmers of Canada, their sons, and their hired men ten hours per day for a period of 113 days, or about the normal period from seed time to harvest.

The famous dust storm of 1901 which fell practically all over Europe had its origin in the Sahara Desert.

The Family Of Smith

Organization Started In Australia Has Been Growing Rapidly

"Are you a Smith?" is a favorite question in Sydney and Melbourne, Australia, since the organization of the Family of Smith. There are many evidence answers, because members are supposed to do their good deeds without revealing anything about themselves. The Family of Smith was organized to help the unemployed, but is including aid to the needy in general. To be Smith and Smith is to spend at least one day or its equivalent each year in helping the general. To be Smith and Smith is to spend at least one day or its equivalent each year in helping the general. To be Smith and Smith is to spend at least one day or its equivalent each year in helping the general.

The announcement was made while Germans still thrilled at what technicians called "satisfactory" sound film broadcasts, which were demonstrated at the 11th German radio congress by means of a television set. Daily transmission of tone films taken from the top of a television car of the German Radio Company stationed in the immediate vicinity of Berlin's radio tower captivated thousands at the radio show.

Safeguarding Fire Calls

New Instrument Is Being Tried Out

A new fire call is being tried out in London. Anybody making a false call will be caught in the act. If a man sends in a call a device in the call box automatically grasps his wrist and holds him until the firemen arrive, when he is released. The new instrument not only serves to prevent false alarms, which cost the London county council alone about \$150,000 a year, but holds the person giving the call at the signal station to direct firemen to the fire.

Valued At Hundred Million

Canada's Gold Production For Year May Be Exported

Exports of gold from Canada during the current year are expected to be in the neighborhood of \$100,000,000 provides the production is all exported. Dr. Charles Cammell, deputy minister of mines, informed a party of Princeton students who spent a weekend in Ottawa. The students, headed by R. M. Field, professor of geology, have been visiting the leading Canadian mining centres.

The people of the United States, considered in toto, have between ten and fifteen trillions hairs on their heads.

The James river is the largest river in Virginia.

HIS MAJESTY LENDS A HAND

King George joins with the crew in hauling on the main sheet of his yacht "Britannia", which won the race for big yachts at the Royal Southampton Yacht Club Regatta at Cowes, Isle of Wight.

Efficiency Of Inspectors Has Made The Dominion The Best Egg Market In The World

Objects To Purple Roofs

Lord Leverhulme Has No Freak Buildings On His Estate

Plans for preserving the amenities of the countryside were revealed by Lord Leverhulme at a meeting in London, where he spoke of a ban on sham timber and the prohibition of purple roofs in his Cheshire estate.

"On my estate in Cheshire," he said, "I have a rule that no building may be erected on any land I sell or lease without the plans and elevations being approved by my advisory architect."

Some conditions Lord Leverhulme imposes are yellow brick not to be used in the elevations; terra-cotta, glazed or hard patent red bricks are not to be used in face work; purple slates are not permitted on roofs; all half-timber work must be properly constructed and framed gables and must not be sham; and no colored glass shall be permitted in the windows.

Within reasonable limits, his lordship added, a great deal could be done to prevent some of the bad development at present taking place.

Should A Duck Swim?

Too Much Exercise Bad For Them

States Authority

From the creation of the first farmyard a pond has been regarded as the essential complement to the duck's happiness.

Now comes "Duck and Goose," a bulletin published by His Majesty's stationary office, to chide the farmer for believing that his ducks should swim. Swimming is only a purposeless recreation where ducks are concerned, according to his authority.

"Though it is grudgingly admitted that swimming tends to keep ducks clean of body and contented of mind."

Swimming, says the bulletin, provides the ducks with too much exercise.

Fire Danger From Smoking

Cigarette Smoking Blamed For 10,000 Fires Annually

J. Grove Smith, Dominion fire commissioner, of Ottawa, laid stress in a paper before the Association of Canadian Fire Marshals on the number of fires originating from tobacco smoking.

Use of cigarettes by persons of all ages and both sexes has resulted in smoking being blamed for almost 10,000 fires annually, said Mr. Smith. Mr. Smith noted fatalities from fires in Canada, numbering 254 in 1933, were 31 less than in 1931.

Yielded Good Crop

A field of Colosse barley yielding 7 bushels to the acre, was threshed by the Field Husbandry Department of the University of Saskatchewan. This is a hooded variety of good feeding quality. Superior bronze rust was strain developed at the university, has yielded nine bushels of seed to the acre.

Cactus plants cannot live without water, and they grow better in summer if they get a good deal of moisture.

Economic conditions in Austria continue to improve.

Price cutting through misrepresentation of quality is effectively controlled in Canada so far as eggs are concerned through the rigid application on consuming markets of the egg grading regulations. The egg inspection staff of the Poultry Services of the Dominion Department of Agriculture is regarded as guarding the interests of the producer in this respect. Since the first of the present year twenty-eight prosecutions have been conducted against wholesale and retail distributors in the larger centres for misrepresentation of grade. All these prosecutions were successful and fines were levied in each instance. The minimum fine under the Egg Regulations is \$25 and the maximum \$500.

The Canadian Egg Grading Regulations were designed with one major object in view namely, to improve prices and marketing conditions in the interests of producers. In the various activities of the egg inspection service none is regarded as more essential than that of preventing eggs of an inferior grade being sold under a higher grade at reduced prices.

The majority of wholesale and retail distributors of eggs in Canada make an honest effort to sell eggs under their proper grade. Occasionally, however, in the stress of business competition, an attempt is made to sell inferior eggs through offering at reduced prices eggs which are represented to be of the highest grade but which really are of inferior quality. There is also a certain class of traders with whom such practices are common. If a constant check on egg representation on this nature was not maintained the result would be a continual decline of egg prices.

The quality and grading of eggs in wholesale and retail stores is subject to continual supervision by the Dominion egg inspectors of the Department of Agriculture egg inspection service. Where eggs are below grade they are required to be regarded or marked with their proper grade name. Shipments from a wholesaler to a retailer, when found below grade, are required to be returned to the wholesaler. Infractions are continued or flagrant, by deliberate, legal action is taken. This constant vigilance on the part of Canada's egg inspectors has made the Dominion over a period of years, the highest price egg market in the world.

Will Improve Conditions

Philadelphia Zoo To Use Moats Instead Of Fences

With a view toward providing the animals with conditions approximating their native habitats, the Philadelphia Zoological Garden is now engaged in an extensive program of eliminating fences around animal runs.

Soon all the animals in the zoo, including lions, tigers, leopards, etc., will be roaming about in areas resembling their natural habitat, with no suggestion of an enclosure between them and the public.

This will be accomplished by substituting wire fences with deep, concrete-faced moats, over which it will be impossible for the animals to leap.

Looking across the moats, which are concealed by a slight rise in the ground level, visitors are given the impression the animals are roaming about free, with no enclosure of any sort.

Two such "fenceless runs," built with CWA funds, already have been opened. One is occupied by the lion herd, while the other run is occupied by the lion-topped llamas.

In a snake pit, built along similar lines as the "fenceless runs," visitors may view more than 100 lizards, turtles and snakes mingling together in their natural surroundings.

Far-Famed Florence

Florence, Italy was the centre of world culture and world finance. There are names associated with Florence that will endure for all time. Some of them are Michelangelo, the Medici, Dante Alighieri, Boccaccio, Machiavelli, Della Robbia, Leonardo da Vinci, Benvenuto Cellini and Raphael.

Variety Of Products

Canada shipped a large variety of products to South Africa last year over 200 different commodities, including apples, rolled oats, wheat, flour, canned vegetables, bladder twine, preserved fish, lumber, agricultural and other implements, etc.

How To Buy Butter

Encouraging The Consumer To Demand The Highest Grade

Among the eight Acts relating to agriculture passed during the last session of parliament, the bill relating to the dairy industry has a particular appeal to the consumer in that it deals with commodities which are in daily use in every Canadian household. Of particular interest to the creamery industry and to the housewife are the new regulations providing for the grading of butter for domestic consumption and the placing of the grade of the butter on the wrapper and on the carton. This grading is optional except in provinces which may pass enabling legislation. The regulations also prohibit the making of false, misleading or exaggerated claims with respect to the quality of butter or any other food product, whether such claims are made by advertisement or on the package.

The grading of butter for domestic consumption has been established in the hope that the quality will be improved through the preference of the consumer for higher quality. In the past there has been much second grade butter sold under fancy trade names that did not convey anything to the consumer as to quality. It is expected that the placing of the grade on the carton and wrapper will mean that the consumer will be encouraged to ask for "First Grade" butter, thereby discouraging the manufacture of lower grade. Also, it is expected that the indication of the grade will have a tendency to create a wider differential of prices between the grades and will tend to reflect back in the prices received for the cream by the producer. In other words, it is expected there will be better prices all round.

The grades of creamery butter are first grade, second grade, third grade, and no grade. "First grade" butter, according to the regulations, means and includes any butter on which any mould has appeared either on the butter itself or on the parchment lining on the package, as well as any butter otherwise inferior to third grade. A dairy producer will not refuse to grade any butter or cheese which in his judgment is either of too high or too low a temperature to permit of proper examination, until the temperature is brought within satisfactory range. The graders are the only persons allowed to mark or brand the packages, and no person is allowed to pack butter in a package which bears the grade marks stamped by the official grade.

Something Never Attained

If Absolute Stillness Possible It Would Be Unbearable

Absolute stillness is practically never attained. A room that is so quiet that it is unbearable, according to research engineers, who have recently tried to make a room and have in fact come as close to obtaining one as they care to. To get their quiet room they had necessary for them to suspend one in space, leaving no rigid connections with the rest of the building. The ceiling is hung from rafters and is not attached to the wall. The floor and the walls are suspended on cushions or springs, and the interior is completely padded or muffled. The effect obtained is that of a room that floats free of the building of which it is a part. Noises from other parts of the building, from the floor below penetrate the room not as sounds but as feelings—they are felt, not heard. A visitor who enters the quiet room notes that he will see that the ordinarily silent noise has sent the pointer spinning far to one side.

These Boys Can Cook

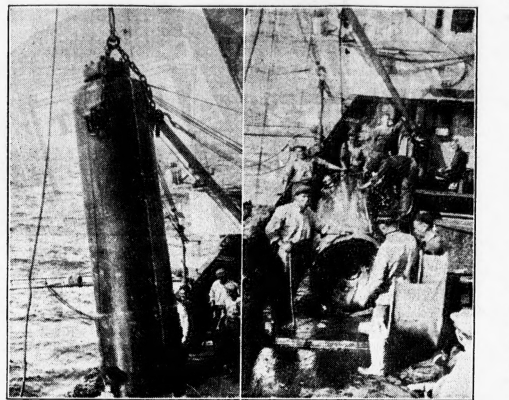

Two Brothers Of Stratford, Ontario, Rated As Experts

Whether it is baking powder biscuits, cookies, red currant jelly, pickles or candy you want, 12-year-old Allan and 15-year-old Fred, sons of Mr. and Mrs. G. W. Henry of Stratford, Ontario, are the boys to see. Between them they entered 26 recipes of home cooking and pie serving in the Canadian National Exhibition competitions at Toronto. Allan's talents in the baking line toward muffins, gingerbread, plain cake and cookies, but Fred's abilities run to such things as layer cakes, sponge cakes, apple pie and tarts. He can turn out doughnuts that are the dream of many a cooking expert.

The largest producer of patent leather among nations in the United States.

W. N. U. 2003

SALVAGERS NEAR THE END OF THE EGYPT'S GOLD

With the salvaging of another \$5,000,000 of gold from the sunken liner, Egypt, the salvage ship "Artiglio" is believed to have recovered nearly the whole of the treasure. For years the salvagers have been working hard to recover the gold bullion, but it has been the most difficult feat, because of the depth at which the liner lies in the English Channel. The success of the work has been largely due to the use of the suction apparatus, which has been specially designed for deep salvage operations. At the left is a view of the suction cylinder being emptied on board the Artiglio, while the picture at the right shows the end of the instrument.

Dangers Of Mountain Climbing

Attempt Fails To Scale The Invincible Peak Of Mount Waddington

Mount Waddington continues to fling out its challenge to mountaineers of the world, the challenge of an "unscaleable" peak. Mr. and Mrs. Don Munday, a boy whose early game went across arctic prairie from his home in Portage la Prairie, Man., and a girl born among the tea plantations of Ceylon. Known most about this invincible peak and declare it can't be climbed. They returned recently from their latest assault, a six-weeks' drive, and said this, too, was the opinion of their companions on the expedition. Henry H. Hall, Jr., of Boston, and Hans Fuhrer, Swiss guide. The latter two were prepared to make an attempt on Mount Robson in the Canadian Rockies.

"The main peak will never be climbed," Munday declared. "Mrs. Munday, Mr. Hall, myself and the guide, Hans Fuhrer, climbed the second summit from Jake Glacier, but the higher of the two peaks appears to be un conquerable."

The party's final attempt on Waddington was made from a camp 25 miles up the giant Franklin Glacier after a storm which lasted nine days. The attempt failed but the mountaineers were non-communative as to the hardships they endured and the dangers they faced in the perilous climb.

The Munday left Vancouver July 11 and, with the aid of packers, pack-packs supplies up the 30-mile-long Franklin Glacier under Knight Inlet. They were joined at the end of the month by Hans and Fuhrer and started the assault on glacier-studded Waddington at once.

The Munday were the first to scale the lower peak several years ago and the giant Franklin Glacier. They have made several expeditions into the wild region near the mountain. Hall made an unsuccessful attempt to climb Waddington last year, and Fuhrer is a veteran guide, noted for his excellent judgment in ice and snow. He was a guide for several seasons in Jasper National Park.

The rock Munday has already claimed one this year. Also Dalgleish, of Vancouver, fell to his death June 26 as he and three companions made an unsuccessful attempt to scale the ice-crooked precipices below the summit.

The Munday en route in the Waddington region, met a group of Vancouver linguists returning after burying Dalgleish amid the high snows of Buckler Glacier, far up the mountain. The linguists were a grim reminder of the dangers they would face in their assault upon the virgin south-east peak.

"Tree-Branch" Mysterio, in Tyrol, is making himself famous by his "tree-branch" music. He invents the crooked limbs of trees into wind instruments from which he really extracts music. One piece requires an eight-foot saxophone, but gives more pleasing music.

It is dangerous for any girl to throw herself at a man, however eligible he may be," we read. But where is the danger if he is a good catch?

Completing Mountain Road

Work In Alberta Will Take Three More Seasons

That 51 miles of a total of 147 of the new Lake Louise and Jasper highway are finished, that the whole work will take three more seasons and that \$40,000 is the value of the work so far done, were statements made at Banff by J. M. Wardle, supervisor and chief engineer of national parks, who recently returned from a pack-train trip through the country between the ends of the completed sections.

"The new road will be an important cut-off," he stated. "It will connect the Trans-Canada, running through Calgary and Revelstoke and the projected trans-continent highway, to run through Edmonton and Jasper and down the Thompson river. It is the most ambitious mountain project attempted in Western Canada. It will not be less than 18 feet wide and no bend will be more than 10 per cent. curvature. The road so far completed could have rails laid on it excepting for the fact that in some places it goes to four or five per cent. grade."

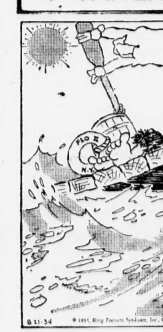

Chest Developments

Says Crooners And Trombonists Have It All Over The Football Player

Husky football players with brawny arms, bulging chests and sturdy legs may be fine physical specimens, but they actually have less chest expansion than crooners, flute players and horn tooters, according to Dr. H. C. Carlson, of the department of physical education, University of Pittsburgh. Addressing coaches attending the Kerr-Charlton coaching school at Colgate University, Dr. Carlson said he had examined hundreds of men and had found invariably that the men with the big chest expansion were singers and blowers of wind instruments.

Napoleon used balloons at the battle of Fleurba in 1794 to observe the enemy lines from a great distance.

FANCIFUL FABLES

Prestige Of Canadian Corps

Improvement Of Conditions For Ex-Servicemen Of Vital Necessity

Re-establishment of the prestige of the Canadian Corps and Allied Veterans is a vital necessity to the improvement of general conditions for the ex-servicemen," says a statement issued by provincial officers of the Canadian Corps Council, "and with the whole-hearted co-operation of your units we feel that this can be accomplished."

The council is an out-growth of the corps reunion held in Toronto, when representatives of many units of the Canadian corps, Imperial and other Allied forces met and elected a provisional council, carrying on the work of organization until such time as a permanent council can be established.

The statement reported the provisional council was engaged in drawing up a constitution and bylaws, and was seeking suggestions from all unit associations of ex-servicemen, to the end that every unit be represented by brigades or other groups of unit associations. It appealed for the starting of unit associations where none exist.

"It is our earnest desire to co-operate with all other veteran organizations," the statement said, "but at the same time to maintain the spirit and traditions of the Canadian corps and other Allied forces to perpetuate their friendships, associations and memories, and to uphold the solidarity of the British Commonwealth of Nations."

Date From Roman Times

Several forces and other surgical instruments found in Ljubljana, in Jug-Slavia, by workmen digging the foundations of a church, are believed to date from Roman times. The instruments were in an earthen urn, which also contained ashes, and it is assumed that the ashes were those of a doctor whose instruments were buried with him.

Police authorities seized 105,000 pounds of tobacco being smuggled over the frontier during 1933.

Scientists Making Progress

Have Restored Life To Animals Killed By Nitrogen Gas

Restoration of life to animals put to death clinically by nitrogen gas, an achievement declared to be much more difficult than that involved in revivification of a creature asphyxiated with ether or chloroform was demonstrated at the laboratory of Dr. Robert E. Cornish, in Berkeley, California. Although the latest experiments have been successful in maintaining the "revived" life only a few days after restoration, the scientific advance is regarded as important, in that, in which Dr. Cornish revived Thirteen, the Irish terrier, after he had been put to death, according to clinical standards, by ether.

The difference is that in asphyxiation by chloroform or ether, enough air remains in the blood, so that, if heart action and respiration are restored within a few minutes the damage to the brain cells is slight.

On the other hand, "death" through such causes as nitrogen, carbon monoxide (auto exhaust fumes) and hydrocyanic gas was considered to cause such instantaneous injury to the delicate mechanisms of the brain as to preclude its ever functioning again sufficiently to maintain even partial life processes.

The possible eventual application of the new achievement to human beings, it is believed may be of vast general importance. There are said to be few if any authenticated cases where persons have been revived after stoppage of heart action and cyanide, carbon monoxide and cyanide, carbon monoxide and cyanide.

Smallest Radio In World

Watchmaker Bault Both Sets Under Double Magnifying Glass

Ten years ago Rufus P. Turner, a watchmaker, of Waltham, Mass., was engaged in the making of a radio. Today he stands on the threshold of virtually being idolized by dwellers of apartment houses, while the uncaring glare of radio has caused loss of sleep, quarrels with neighbors, breaking up of the family unit.

Turner holds two of the smallest radios in the world, one built on the shaft and head of a common straight pin, the second a little larger, but yet small enough that it can pass through the eye of a needle.

Turner's assistants are on exhibition, the second of which he completed recently. Turner's sets were made under a double magnifying glass and minute instruments. He made two "crystal" sets, one of a very fine piece of platinum wire, .002 of an inch in diameter, second of copper lead, .001 of an inch in diameter. Core between the two sets of coils produced rectifying action which enabled Turner to pick radio programs with the aid of a 200-foot aerial.

Earphones are used, there being no possible way to amplify the sound through a loudspeaker.

Highways Of The Sky

Air Travel On European Routes Increasing Rapidly

Traffic on the European air routes is increasing steadily. During the course of a single day, just recently, more than 250 passengers flew between London and Paris in the big airliners of Imperial Airways Air transport, with its luxury and speed, not only reduced from days to hours the time required in journey across the Continent, but it robbed long-distance travel of discomfort and fatigue. Recent speed-ups, for example, now enable air passengers from London to reach Berlin in 4 hours, 15 minutes; Copenhagen in 4 hours, 25 minutes; Rome in 5 hours, 30 minutes; and Madrid in 12 hours, 10 minutes; while times have also been reduced, considerably, on many of the longer flights across Europe. To Moscow, for instance, by present schedules, the actual flying time from London is only 17 hours, 5 minutes; while to a point as distant as Istanbul it is not more than 17 hours, 55 minutes.

Malta's Official Language

Maltese has been declared the official language of the British island of Malta and will hereafter be recognized as such in the Maltese courts. The large Italian population of the island has nevertheless urged Italianization of the country, and the Maltese tongue was recognized only in a semi-official way.

Mars rotates on its axis in 24 hours, 37 minutes and 22 seconds, so that its day is only slightly longer than that of the earth.

Quails help the farmer by eating many weed seeds.

Agricultural Notes

Interesting Items Gleaned From Many Sources

The air mail postage from Canada to the British Isles is now five cents each class.

Exports of Canadian live cattle to the British Isles for 1934 from January 1 up to August 28th totalled 141,318 as against 138,418 for the corresponding period of 1933.

The number of hogs graded in Canada for the first 34 weeks of 1934 ending August 23, was 1,985,482 compared with 2,068,468 for the corresponding period of 1933.

Shipments of livestock from Western to Eastern Canada from January 1 to August 17, 1934 included 52,388 cattle; 540 calves; 145,135 hogs; and 45,060 sheep.

With the egg export season close at hand, there are indications that there will again be an active export trade in Canadian eggs to the British Isles.

Total exports from Canada to Australia for the fiscal year ended June 30, 1933, were valued at \$2,515,468. Delayed storage plays an important part as a cause of soft seed and soggy breakdown of apples.

The production of straw from Canadian canna was very fine. This Canadian product has been sold in the Fiji Islands, Canada also has supplied the increase being the Fijians of fresh salmon, and smoked and canned fish.

The production of creamery butter in Canada in July 1933, amounted to 25,146,778 pounds, showed an increase of 3,507,602 pounds compared with July 1932, the province contributing to the increase being Quebec, Ontario, Manitoba, Saskatchewan, Alberta, and British Columbia.

The excessive holding up of stocks of non-perishable products of unknown dimensions in times of depression is apt to prolong the period by the feeling of uncertainty it engenders, and purely speculative transactions in perishable commodities is inimicable to orderly marketing.

During the month of July 1933, 11,000,000 lbs. of bacon were exported to Great Britain, compared with 7,300,000 lbs. during July, 1932. The total shipments of bacon for the first seven months of 1934 amounting to \$1,094,600 has as against \$1,787,700 lbs. during the corresponding seven months of 1933.

When packing eggs for shipment, a good practice is to brush the hard lightly over each filler as it is packed to make sure that no eggs are protruding above the top of the filler. Such eggs almost invariably will break in transit. Before packing a can, examine the bottom and sides. If the can is full of eggs, it will fall out, replace them—Egg and Poultry Market Review.

Will Winter In Canada

French Countess Leaves Castle To Follow Her Husband

Castles in France have been exchanged for a trapper's camp in northern Manitoba by Countess Guyot de Malmberg, who is to spend the winter on a trap line north of Sheridan in search of new experiences. Countess Guyot is no stranger to Canada. For several years she has visited Canada forests in search of moose and deer during the hunting season. Her explorations have included canoe journeys from Roberval to James Bay and down the northern rivers. During her last visit she followed a trap line for three weeks in the north and became so enamored of the life that this winter she will stake out her own trapping territory.

Countess Guyot went to the Pae, Pa. Manitoba, and from there to Sheridan where her equipment, including a sleigh, dog, canoe and outboard motor, was waiting. After building her main camp miles away from civilization she will set up two outposts and follow the trap line during the winter season.

Walks Miles To Feed Birds

Leo Piech, 71, who lives at Superior, Wisconsin, who wants to be a naturalist, walks miles to feed birds in a pail of freshly-dug worms which he feeds to 200, or more, baby birds in their nests. His customers include robins, bluebirds, catbirds, marsh wrens and flickers.

Plants are most active during the period between noon and three in the afternoon.

The strongest known timber is yate, one of Australia's hard woods.

Manchuria is to have many new highways.

The Victoria Cross was instituted in 1856.

Conak and Mrs. Dunlop and
children, have returned from
their holiday vacations.

D. McEachern and N. D. Stor-
ey were visitors to Medicine
Hat on Friday.

The crop grown by the best
growers in the irrigation dis-
trict at Raymond, this year, is
estimated as worth over a mil-
lion dollars.

The ladies of the Social Plains
W. I. met at the United Church
manse on Wednesday after-
noon, being the guests of Mrs.
A. J. Law.

Mr. and Mrs. Geo. Turner and
family, have left for the north
country, and are making their
home in the Battleford district.

Glen Russell, who took a
truckload of household furni-
ture and effects north for Geo.
Turner on Friday, returned the
first of the week.

Mrs. N. D. Storey and Mrs.
N. P. Storey, and baby son
Freddy, returned on Saturday
last from a visit to Regina.

The Catholic Church Harvest
Supper on October 3rd, will be
distinguished by the presence
of His Lordship Bishop J. P.
Monsignor, of Calgary. The
ladies invite the support of all
who can attend.

The regular monthly meeting
of the United Church Ladies'
Aid will be held on Tuesday,
October 2, at the home of Mrs.
Reg. Pool, at 8 p.m. sharp. A
full attendance is requested.
Kindly note change in date of
meeting.

Hunters have been out since
the first of the week, and quite
a few geese have been shot. At

the present interest is keen in
hunting trips.

Weather of the past week
has been very wintry for this
season of the year, a drastic
change from preceding tem-
peratures. Snow that has fallen
has melted during the day;
at night the ground has frozen.
Those who had vegetables in
the ground, made haste to get
them dug. Wednesday the sun
was shining for a brief time.
Today, there has been light
rainfall.

Money is not a thing in itself.
Money is a symbol of something
else, and has no existence as
money excepting in its relation
to that other thing. That other
thing is wealth, and wealth is
but a term for things which
supply human wants. One might
collect all the money in the
world, if it were the wealth of
the world by any chance should
vanish, he would have no
money, for that which had been
a symbol of wealth would auto-
matically become a symbol of
nothing at all. — Edward A. Fil-
son in "Successful Living in
This Machine Age."

The Alberta Wheat Pool an-
nounces that commencing Oct-
ober 1st, wheat placed in the
1934-35 pool will receive an in-
itial payment based on No. 1
Northern, Vancouver, of 30c a
bushel. The pooling of wheat,
of course is entirely optional
with the grower. Those desir-
ous of placing wheat in this
pool should see the Pool Elevat-
or or Agent.

To Flash Messages To Any Part of World by Micro Waves

A New York dispatch in the
Christian Science Monitor says a
revolutionary development in
radio communication that will
make it possible to link all large
cities throughout the world for
instantaneous transmission of
messages and pictures through
the air is being launched by the
research engineering division of
the Radio Corporation of Amer-
ica.

Micro waves are the messen-
gers of the new air era, on which
engineers can flash 20 pictures
a second. They impinge measur-
ed in inches from crest to crest,
the micro waves reach only as
far as the horizon, but they are
static free and are not influ-
enced by fading. These qual-
ities, enable engineers to oper-
ate by means of the micro-
waves at terrific speeds.

Facsimile radio is the name
engineers have given the new
process which, they say, opens
the gateway to telephony. Not
only will the new system in-
crease to an almost incredible
speed communication between
all parts of the world, but en-
gineers hold that it will scrap
the Morse code and supersede
many telegraph and wireless
devices now in use.

Since the micro waves dis-
appear at forty miles, in trans-
mitting over them for longer
distances a series of booster sta-
tions will be used.

R. M. of Manitoba No. 262

Minutes of meeting of the
Rural Municipality of Manitoba,
To be held, September 4th, held at
P. M. 1st, Reeve Dahl and a
full Council.

Minutes of previous meeting
read and confirmed on motion
of Councillor Hawtin.

Statement of Receipts and
Expenditures for the month
was shown from the cash books
and approved.

Rowles—Re Doctor McNeill—
guarantee of payment—indig-
nents.

That in the case referred to
we quote to the Doctor the jud-
gement given in the case of
R.M. Parkdale and Dr. Ramsey.
Referring to the case in ques-
tion in this Municipality, that
we advise, we understand that
there are chattels, horses if
nothing else, that could be sold
to pay this bill. Under the cir-
cumstances, the Municipality
would deny the liability on the
grounds that this patient is not
an indigent within the meaning
of Sec. 223, s. 2 of the Rural
Municipality Act.

Accounts passed by finance
committee.—Roads, Division E.
E. H. Ashley, 6.00; Div. 2 V.
French, 19.30; Div. 6, Eric Mc-
Nally, 3.50; J. W. Hawtin, jr.,
23.80; Div. 4, Geo. A. Clark,
7.50.

Geo. Treas. postage, 14.00; L.
Shingley, grasshopper control,
79.00; T. R. Whitley, blunder-
twine, 11.00; J. Donnelly, thresh-
ing, 8.40; B. Frey, relief, 3.05;
Wallace and Cleland, machinery
repairs, 18.65; Western Mun.

N. S. 691 7.50; K. A. H. H. Ho-
pital, 105.60; Arneson Grocery,
binder twine, 20.35; P. Wilson,
combining, 30.00. Total, 370.49.

Kimh—That the above ac-
counts be paid as soon as funds
are available.

Finance—That a cheque be
issued A. A. Parker on account
of assessment, \$200.

Hawtin—That whereas the
Public Revenue Tax was origi-
nally levied with a view to
equalizing taxation for educa-
tional purposes;

And whereas the grant to
Rural Schools has been reduced
by one third, while the public
revenue tax has been increased
by one third;

And whereas the municipali-
ties are required to bear one
third of the relief expenditures,
1933-1934, and it has been in-
timated that a still larger propo-
tion of relief will be placed

Tenders Wanted

SEALED TENDERS will be received by
the undersigned up to and including
the 10th day of October, 1934, at his office
in the City of Regina, in the Province
of Saskatchewan, for the purchase of what
generally known as the Saskatchewan
Co-operative Creameries Limited build-
ing, together with the equipment and
land connected therewith at Empress.
Tenders should state price of building,
equipment and land separately, and the
terms of payment. List of equipment
may be obtained from the undersigned.
Tenders must specify for what purpose
the proposed purchaser intends to use
the said property. The undersigned re-
serves the right to reject any tender.

A. C. BURTON,
Receiver and Manager,
SASKATCHEWAN CO-OPERATIVE
CREAMERIES LIMITED

THE OBJECTIVE !

Alberta Pool Elevators are out to prove that
a co-operative grain handling concern can be
an instrument of usefulness to all grain growers
and a successful business concern as well.

Every grain grower in the vicinity of an
Alberta Pool Elevator is invited to aid in this
effort to perpetuate in Alberta, by Alberta,
for the good of all, a strong, grower-controlled,
co-operative organization.

This can be done with advantage by
delivering grain in wagon lots or
or car lots to

Alberta Pool Elevators

upon them;
And whereas the cost of hos-
pital and medical aid to indi-
gents is constantly increasing;
And whereas no road grants
are now received for mainten-
ance;

And whereas the Public Re-
venue Tax is now approximately
one third of the taxation on
land;

That this association request
that the municipalities be re-
lieved of the said tax, or that
the former allotment for school
grants and road grants be re-
stored; and that this resolution
be forwarded to the Association
for consideration at the next
convention — Ayas 6, Nays 1,
carried.

Dahl—That a bylaw be sub-
mitted at the next meeting for
municipal hall insurance, and
that Mr. Near be asked to
attend the next meeting at the
Orange Hall and explain the
operation of Municipal Hall.

Rowles—That we consider
the conditions in this Munici-
(cont. on back page)
